

Mehma Qudsia

Digital Solutions Developer | WordPress • Shopify • GoHighLevel • AI Automation

+92 313 5279257 • mehmaqdsia94@gmail.com

PROFESSIONAL SUMMARY

Results-driven Digital Solutions Developer with 5+ years of experience building and automating digital ecosystems across WordPress, Shopify, and GoHighLevel (GHL). Specializes in end-to-end web development, CRM automation, lead funnel architecture, and AI-powered agentic workflows. Proven track record delivering 40+ client projects across the UAE, Sri Lanka, Pakistan, and Australia, with deep expertise in sales funnel optimization, email automation pipelines, and real estate digital marketing.

AGENTIC & AUTOMATION CAPABILITIES

GoHighLevel (GHL) Automation Architecture

- Designed and deployed multi-step agentic automation workflows in GHL including trigger-based pipelines, conditional branching logic, and tag-driven client segmentation
- Built full lead lifecycle systems: lead capture → nurture sequences → booking → onboarding → retention, all automated end-to-end
- Created intelligent email & SMS automation sequences with behavioral triggers (link clicks, form fills, appointment status changes)
- Developed custom CRM sub-accounts, user role configurations, and white-label SaaS snapshots for client resale
- Implemented GHL's AI Conversation Bot for automated chat responses, appointment bookings, and FAQ handling
- Integrated GHL with third-party tools: Calendly, Stripe, Meta Ads, Google Ads, ManyChat, and ConvertKit via webhooks and Zapier
- Architected Instagram DM automation funnels using ManyChat connected to GHL pipelines for lead qualification
- Built A/B-tested opt-in funnel systems with conversion tracking, UTM parameters, and Pixel integrations

AI-Powered & Agentic Development

- Built custom AI-powered web applications using Replit and Base44, including dynamic real estate landing pages with intelligent property filtering
- Developed agentic property showcase apps that auto-populate listings, pricing, and inquiry forms from backend data sources
- Integrated AI chatbots and virtual assistants into client websites for 24/7 lead capture and qualification
- Leveraged no-code/low-code AI tools to automate content generation, social media scheduling, and client reporting workflows

Funnel & Conversion Architecture

- Designed and launched 30+ high-converting GHL funnels for luxury real estate brands in Dubai (Emaar, Meraas, Aldar, Sobha, Nikki Beach)
- Built SEO-optimized funnel pages with structured data, fast load times, and mobile-first design

- Implemented complete Meta Pixel and Google Ads conversion tracking across funnel stages
- Created multi-language funnel variants for international property expos (Philippines, Malaysia markets)

EXPERIENCE

GHL, WordPress & Shopify Developer & Coordinator | [Retrographic Digital](#) — Remote / Dubai

Nov 2024 – Mar 2026

- Led development and delivery of 20+ GHL funnels for UAE luxury real estate clients including Emaar, Meraas, Aldar, and Sobha
- Coordinated cross-functional remote team across design, development, and client communication
- Architected GHL automation systems for lead management, appointment booking, and client onboarding
- Built and maintained WordPress and Shopify client sites with WooCommerce, payment integrations, and custom plugins
- Delivered SEO strategy and on-page optimization for funnel and web properties

WordPress Developer & Team Leader | [DesignBey](#) — Remote / Sri Lanka

Mar 2022 – 2025

- Led a team of developers delivering WordPress projects for e-commerce, services, and hospitality clients across Sri Lanka
- Managed end-to-end project lifecycle: scoping, theme customization, WooCommerce setup, payment gateways, and post-launch maintenance
- Handled complex migrations (staging → production), plugin management, and performance optimization
- Delivered 15+ complete website builds including tour booking platforms with custom dashboards

WordPress Developer | [Digi Pro Ventures](#) — Remote / Pakistan

Jul 2023 – Dec 2024

- Developed and maintained WordPress websites for diverse client verticals including real estate, cleaning services, and e-commerce
- Implemented Elementor and Divi-based custom designs with full mobile responsiveness
- Integrated WooCommerce, PayPal, and installment payment plugins

Freelance WordPress Designer & Developer | [Upwork](#)

2020 – Present

- Delivered 40+ client projects ranging from branding websites to full e-commerce stores
- Specialized in ConvertKit email automation integration, Meta Ads setup, and social media pixel configuration
- Maintained long-term client relationships with ongoing retainer-based maintenance contracts

Meriva Sunset	Custom real estate funnel app (Replit)	—
Designbey App	Website/design tool app built on Base44	design-masters-cf38fa7a.base44.app

Pakistan's First AI-Powered Verified Service Network | [Live App](#) | [GitHub](#)

Deployed on Google Cloud Run • Built with Google Antigravity, Gemini 2.0 Flash & Google Maps API

Problem Solved: 35 million skilled informal workers in Pakistan (plumbers, electricians, painters) are invisible to the digital economy. Customers rely on WhatsApp with zero verification, no safety, and no price transparency. Mahir solves this with a fully agentic AI system that automates the complete service booking lifecycle — without requiring workers to own a smartphone.

9 AI Agents Architected in Google Antigravity:

- Language Agent — understands Roman Urdu, Urdu, English, and mixed-language input
- Complexity Agent — classifies job as Basic / Intermediate / Complex to route correctly
- Discovery Agent — finds nearby verified workers via Google Maps Places API
- Matching Agent — ranks providers using 8 factors including rating, distance, and verification status
- Scheduling Agent — prevents double bookings and manages real-time waitlist
- Pricing Agent — generates full itemised price breakdown in PKR before booking
- Booking Agent — AI calls worker in Urdu on their basic phone and processes keypress confirmation
- Safety Agent — guardian notifications, panic button, and job timer for customer protection
- Dispute Agent — automatically handles no-show, quality, and pricing disputes

Key Innovations:

- Zero app required for workers — AI calls them in Urdu on any basic phone
- Police Khidmat Markaz (PKM) verification system — renewed every 6 months
- Urdu voice-guided onboarding for low-literacy workers (Web Speech API)
- Worker-to-worker referral bridge connecting experienced ustads with young workers
- Reduces time to find a verified worker from 45–90 mins to under 60 seconds
- Cost per booking: ~Rs. 17–20 (\$0.06) end-to-end at any scale

Tech Stack: Python Flask • Google Antigravity • Google Gemini 2.0 Flash • Google Maps API • Google Cloud Run • HTML/CSS • Twilio Voice (Urdu) • JazzCash Payment
